

External three-phase digital meter for Dynamic Load Management (Power Management). For EVO Series also PV integration.

Code	EVDTSU6663PH
Type	EVDTSU6663PH

DESCRIZIONE DEL PRODOTTO

By coupling this external meter to a PLUS Series or EVO Series product, it is possible to activate the Dynamic Load Management function for domestic loads (Power Management) to avoid disconnection of the power supply line. The integration functions with the photovoltaic system can also be activated on the EVO Series with the same meter. Direct insertion three-phase digital meter.
